TRADEMARK OFFICE**

**In re application of:** Chen et al. **Group:** 2186  
**Serial No.:** 10/763,889 **Examiner:** Tuan Thai  
**For:** **NETWORK ATTACHED MEMORY AND IMPLEMENTATION THEREOF.**

1. This office action is responsive to amendment filed on 04/03/06. Claims 18, 20-38 and 42-51 are now allowed. Claims 1-17, 19, 39-41 and 52-53 have been canceled.

**REASONS FOR ALLOWANCE**

2. The following is an Examiner's Statement of Reasons for Allowance:

The prior arts of record do not teach nor suggest, either alone or in combination, all the limitations of the claimed invention (claims 18 and 42). The closest prior arts of Horan et al. (5,914,727), Stamm et al. (5,404,482) and Ulrich et al. (2002/0156973) do not disclose the device ID is an index to a device entry in a device ID lookup table and each device entry has device information, for example, the network and authentication information, for one to connect to and access the associated device. The block ID in the claimed invention is an

index to a block entry in a block ID table, and each block entry has block information including not only a memory starting address, but also block size, number of pages in the block and other block information, by using block index directly allows changing the block information including starting address in the block entry in the block ID lookup table to effectively change a memory location without changing the virtual address itself. In light of the foregoing, claims 18 and 42 of the present invention are found to be patentable over the prior art.

Any comments considered necessary by Applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
